

Apprentice & Graduate Intake 2016

AECOM is a premier, fully integrated professional and technical services company positioned to design, build, finance and operate infrastructure assets around the world for public- and private-sector clients. With nearly 100,000 employees, including architects, engineers, designers, planners, scientists and management and construction services professionals — serving clients in over 150 countries around the world.

About the Role

Our Cardiff based Civils and Infrastructure Engineering Team is seeking enthusiastic individuals to join AECOM's expanding Transportation Division as apprentices and graduates. They would be working in an exciting and dynamic design office on a range of projects from local highway improvements, large scale developments to national and international highway schemes.

Why Choose AECOM?

At AECOM we are committed to growing the team and enhancing technical and professional skill base of all our employees.

Many of the Cardiff team are on day release to local colleges and universities to study for MEng, HNC and BTEC qualifications, fully funded by AECOM and commensurate with their career paths.

Projects

Below is a sample of the type of projects we have recently worked on

Aberystwyth University – Penglais Halls – Infrastructure

Waterston and Blackbridge Highways

Al-Wukair South – Qatar – Infrastructure

Cardiff High Street – Public Realm
